Vancouver

07.45am

Bellevue

bohyemianote,

Vancouver, Canada
01019-01028.2019

A. Best papers

1. [FlowSense: A Natural Language Interface for Visual Data Exploration within a Dataflow System](#)
2. [Data Changes Everything: Challenges and Opportunities in Data Visualization Design Handoff](#)

B. Keynotes

1. [Keynote: Visualizing Temporality and Chronologies for the Humanities](#)
2. [Interpretability — now what?](#)
3. [Mixed-Initiative Visual Analytics: Model-Driven Views and Analytic Guidance](#)
4. [Zoom in: Features and Circuits as the Basic Unit of Neural Networks](#)
5. [LOoW: Visualizing Art & Science collaborations](#)

C. Studies from Workshops

1. [How Does Visualization Help People Learn Deep Learning? Evaluation of GAN Lab](#)
2. [mVis in the Wild: Pre-Study of an Interactive Visual Machine Learning System for Labelling](#)
3. [How to evaluate a subspace visual projection in interactive visual systems? A position paper](#)
4. [Analyzing the Design Space for Visualizing Neural Attention in Text Classification](#)
5. [Deconstructing BERT: Visualizing the Inner Workings of Attention](#)
6. [A Visual Introduction to Graphical Data Representations](#)
7. [Selecting the right tool for the job: a comparison of visualization algorithms](#)

D. Papers

1. [Summit: Scaling Deep Learning Interpretability by Visualizing Activation and Attribution Summarizations](#)
2. [FairVis: Visual Analytics for Discovering Intersectional Bias in Machine Learning](#)
3. [Visual Interaction with Deep Learning Models through Collaborative Semantic Inference](#)
4. [Visualizing RNN States with Predictive Semantic Encodings](#)
5. [LassoNet: Deep Lasso-Selection of 3D Point Clouds Multi-Channel Image Data](#)
6. [Searching the Visual Style and Structure of D3 Visualizations](#)
7. [You can't always sketch what you want: Understanding Sensemaking in Visual Query Systems](#)
8. [Topic-based Exploration and Embedded Visualizations for Research Idea Generation](#)
9. [Multimodal Analysis of Video Collections: Visual Exploration of Presentation Techniques in TED Talks](#)
10. [Supporting Story Synthesis: Bridging the Gap between Visual Analytics and Storytelling](#)
11. [Mapping and Visualizing Deep-Learning Urban Beautification](#)
12. [What is Interaction for Data Visualization?](#)
13. [Why Authors Don't Visualize Uncertainty](#)
14. [A Deep Generative Model for Graph Layout](#)
15. [Persistent Homology Guided Force-Directed Graph Layouts](#)
16. [Mapping The Prelude: A Visualisation of Wordsworth's Poetry](#)
